## What's New

The following table details the new features and functionality included in this release.

<b>ID</b>	<b>NetSuite</b>	<b>New Feature Release Note</b>
CHM-6929		Chamo now uses Apache Log4j version 2.17.0. This update prevents Chamo from being affected by the CVE-2019-17571 cybersecurity vulnerability.

## Fixed Issues

The following table details the fixed issues for this release.

ID	NetSuite	Fixed Issue Description
CHM-6722		On the Popular Searches Report screen of the Administrative interface, you previously could specify a report End Date that was earlier than the Start Date. If you then selected Run, Chamo displayed the report output screen with no data. This is fixed. Chamo now displays a warning if you enter an End Date that is earlier than the Start Date and prevents you from running the report. This fix was also applied to the Records Viewed report, the Zero-Hit Searches report, and the Login Statistics report.
CHM-6890	921628	Chamo displayed the following error when you performed a search for the word "collation" in the patron interface: "An error has occurred while executing your search. Ensure the Solr URL is correct." This is fixed.
